

Homework:

Why do we have to do homework? The answer is simple: no one remembers things by just hearing or reading it once. I certainly don't. We need the repetition, the handling of the information via multiple times and multiple pathways. That is the real reason!

Practically, we need to do it for our grades. If you do not do one homework, it can affect your whole grade. If you skip a homework and get a zero on it, it takes 4 - 100s to bring it up to an 80. If you skip a few homeworks, you can kiss your homework grade goodbye. But it does not end there. If you have a quiz on the material and you didn't do it you do badly on the quiz; if you have a test on the material, your test score is down. So not doing your homework affects your whole grade. BUT vice-versa is true, if you do every bit of your homework your homework grades are up, but so are your quiz and test grades. Simply, because, by doing the homework, you know the material better.

Homework		Quiz	Tests		Homework	Quiz	Tests
0	0	50	F		93	89	87
100	80	75	C		84	82	83
100	90	85	B		78	75	77
100	0	50	F		87	85	86
100	70	65	D		91	89	90
80	~ 50	~ 65	D		~ 86	~ 84	~ 85

Last: the final way to look at this is easy; you see all the kids who are doing their homework, the kids getting A's and B's. When you grow up do you want to work for them? ?NO? Because they do the work, they will be the ones who get the good job, they will be your boss. IF YOU would rather be the boss or start your own business ... then do the work. Do good in school, go to college get a good job !!!
